

Rouse Matrix Systems™ Design Project

to Stretch Your Imagination™

© RPI 1998 Printed in the USA

Materials List

- (4) RMS™ Builders
- (168) 11" Balloons, White in Illustration
- (252) 11" Balloons, Red in Illustration
- (4) Serpentine Tables with 5' Inside Diameter & 10' Outside Diameter
- (1) 60" Diameter Round Table
- (1) 48" Diameter Round Table
- (80) 5" to 8" Cable Ties
- (1) 8" Diameter Balloon Template
- (1) Electric Air Inflator
- (4) 120" Rectangle Tablecloths
- (2) 120" Round Tablecloths

RMS™ Cake (10')

Assembly Steps

- (1) Use cable ties to connect 4 RMS™ Builders sections together as shown to the right.
- (2) Count 26 tabs and cut matrix.
- (3) Inflate and size 11" balloons to 8" diameter with template.
- (4) Expand Matrix and load balloons in pattern shown in picture above.
- (5) Cover 4' round table with cloths & place any cake top decor.
- (6) Set 48" round table on 60" round table.
- (7) With the bottom edge on the 60" table, wrap the smaller section of the Builder around the 48" table.
- (8) Cable tie ends of Builder together and add final balloons at joint.
- (9) Surround 60" table with the 4 serpentine tables and cover serpentine with tablecloths.
- (10) With bottom edge on floor, wrap the larger Builder section around serpentine tables.
- (11) Cable tie ends of Builder together and add final balloons at joint.

Banner Idea !

You can turn the top layer of the cake into a "banner" with appropriate text by substituting 2.5 RMS™ Builders for the 1.25 Builders wrapped around the 48" table.

Tips & Notes

- (1) This design maximizes floor space by using bottom layer of the cake for food buffet, literature or product displays.
- (2) Diameter of second layer may be increased with the use of additional Builder sections.
- (3) Load balloons into Matrix from the "back" (inside of curve) in doublets to save time and get a cleaner look from the front.
- (4) Try decorating the sides or top of the cake with RMS™ Star or Heart overlays.
- (5) Let tablecloths hang down behind balloons to prevent seeing inside cake.
- (6) Use of white balloons as trim on top row of Builder sections reduces visibility of Matrix.
- (7) Cake may be trimmed with tulle, net, or ribbon anchored between Matrix and balloons or attached with double sided tape.
- (8) Look for more tips packaged with the RMS™ Builders.
