

# 24' by 11.5' Mardi Gras Mask Entrance

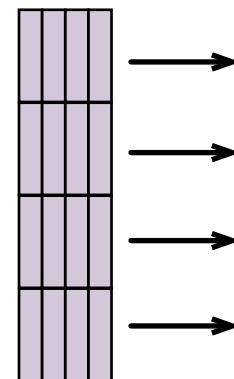

to Stretch Your I magination™

© G. Rouse 1998 - Printed in USA

This Mardi Gras Mask Entrance takes less than 1,100 latex balloons inflated 8" in diameter. (831) balloons are used to make the mask as shown above. There are (227) Gold, (229) Green, (170) Purple, (193) Black and (12) White. The narrow (2.5') tunnel suggested for the back side of the entrance section would take about 220 additional balloons in 2 RMS™ Builders. The mask portion shown directly above uses 8 RMS™ Builders.

The Builders come with (2) half Builders in a package. Lay out and connect the 16 pieces in the pattern shown to the right. The framework expand in the direction of the arrows as balloons are loaded. It is usually easiest to load the balloons according to the picture above and cut the opening with scissors afterwards.
