

***Materials Needed:**

- 19 Lime 5" Balloons
- 14 Orange 5" Balloons (Double this number for two sided display.)
- 11 Yellow 5" Balloons (Double this number for two sided display.)
- 11 Purple 5" Balloons
- 10 Teal 5" Balloons
- 1 Red 5" Balloon
- 2 Red 260 Balloons
- 1 Purple, 6" Heart Balloon
- 1 RMS™ 2' Heart Framework
- Adhesive

Directions:

Open RMS™ 2' Heart and follow packaged directions unless otherwise noted below.

Inflate 2 lime balloons to 3". (for two smaller openings on outside edge of fish)

Inflate 9 purple balloons to 4". (for center diamond pattern in fish)

Inflate 10 teal balloons to 4". (for top and bottom patterns toward rear of fish)

Puff both #260 balloons and tie in singles. (Do NOT inflate to normal diameter.)

Fully inflate purple heart balloon.

Inflate two purple balloons to 3" in diameter and tie them closely together. (to be used where heart shaped balloon tail joins Matrix)

Inflate 14 orange balloons to 1" in diameter.

Inflate 11 yellow balloons to 1" in diameter.

Load the balloons that were inflated 4" into RMS™ 2' Heart per "Fish Heart" diagram. To give extra security, we recommend tying the necks of balloons together in pairs before inserting them into the Matrix.

Load the two 3" lime balloons into the small "corner" opening in the Matrix.

Make The Spots: Attach the yellow and orange balloons into their respective place. Stretch the necks of each balloon down and around the intersection of the Matrix straps where four balloons meet. Pull the end of the balloon neck up, then wrap it several times around the other (downward) portion of the balloon neck. Press the neck and the inflated portion of the balloon down into the crack between the larger, surrounding balloons.

To Make The Eye: Slightly inflate the 5" red balloon and form an "apple twist". Attach the "eye" to the fish with adhesive. As an alternative, form an uninflated 5" red balloon into a flat circle and adhere it into position with adhesive. Draw a black center on eye with permanent marker.

To Make The Front Tentacles ("Whiskers"): Tie the knotted end of the puffed # 260 balloons to the Matrix where the first and second balloons meet on the underside of the fish.

To Make The Tail: Tie the neck of the inflated heart shaped balloon to the Matrix at the "V" of the RMS Heart. Tie the pair of purple balloons that you inflated 3" to the point where the heart balloon is anchored to the Matrix. If you should still have trouble keeping the tail in place, use adhesive to secure the position of the tail.

***Note:** This design may be created in RMS™ 3' Heart Framework. Use 9" or 11" round latex balloons underinflated to 6" instead of the 5" balloons underinflated to 4".
